Jenish Vaghasiya

+91 97249 92568 | jenisvaghasiya09@gmail.com | [LinkedIn](#) | [GitHub](#) | Gujarat, India

SKILLS

Programming Languages: JavaScript/TypeScript, SQL, C, C++, HTML/CSS
Frameworks & library: ReactNative, ReactJS, Node.js, Redux, React Navigation
Database: MySQL, MongoDB
Services and Tools: AWS service integration, Git, MS Office

EXPERIENCE

Freelancer | *Trustbox Cloud* *Feb-2025 - Current*
Technologies: ReactJS, NodeJS, MongoDB, REST API, AWS, iFrame
- Developed a scalable multi-role platform with Super Admin, Client Admin, and User dashboards for managing branded video campaigns.
- Enabled Client Admins to configure user rights, create campaigns, upload videos, and customize video player themes per campaign type, with access to real-time analytics (views, clicks, shares).
- Integrated iframe-based video embedding and built dynamic user panels to view and share campaigns, with all user roles and themes securely managed via MongoDB.

Web Developer | *Digitattva Technolabs* *Jan 2024 – Feb 2025*
Technologies: React Native, JavaScript, TypeScript, Redux, React Navigation, Axios, Tailwind CSS, AsyncStorage, OneSignal, Zoho API
- Worked across multiple projects, including Jain Panchang, Society Management, and Certified Backflow Jobs, focusing on bug fixing, debugging, and scalable feature development using React Native and TypeScript.
- Developed and maintained Society Management app suite (User, Gatekeeper, Manager), implementing QR code scanning, real-time alerts via OneSignal, visitor access management, and emergency notification features with Redux and React Navigation.
- Implemented Certified Backflow Jobs app with offline-first support using AsyncStorage, integrated Zoho APIs for job scheduling, and used Redux for state management.
- Ensured responsive UI/UX with Tailwind CSS, handled RESTful API integration using Axios, and used React Hooks for efficient component logic and data handling across apps.

ReactJS Developer | *Softnoesis* *Jul 2023 – Aug 2023*
Technologies: ReactJS, JavaScript, CSS, Responsive Design
- Collaborated with the company's development team to design and build a fully responsive Real Estate website using ReactJS.
- Focused on delivering an optimal user experience across devices, enabling smooth navigation and interaction with property listings.
- Applied best practices in responsive UI design with efficient API integration.Intern Developer | Softnoesis

PROJECTS

Daily Todo - Stay Organized 🔗 *React Native, NodeJS, Redux, API Integration*
- Built a dynamic To-Do app with folder/file/task creation, drag-and-drop, and a multi-tab home screen containing Recently Used lists.
- Enabled full offline support using AsyncStorage with seamless offline-to-online sync on reconnect.
- Converted the web app to a mobile version using React Native with API integration.
- Implemented task tracking (Ongoing/Completed) with local storage and real-time updates.

AllrangeKit ⭕ *ReactNative*
- Developed a fully functional kit purchase flow integrating Stripe and PayPal payment gateways.
- Implemented Redux state management and handled app-level caching to optimize performance.
- Integrated RESTful APIs to ensure seamless data exchange between the frontend and backend.

Face Recognition (R&D) *ReactNative, AWS Rekognition*
- Integrated AWS Rekognition to upload and annotate images for building a searchable face dataset.
- Implemented real-time face identification that returns matched IDs from pre-fed data upon image upload.
- Designed logic to detect and recognize multiple faces simultaneously within a single image.

EDUCATION

Bachelor of Computer Engineering, Sarvajanik College of Engineering   **Surat, GJ, India | Aug 2020 – Jul 2024**
Higher Secondary School, P.P. Savani Vidhyabhavan   **Surat, GJ, India | Aug 2018 – Jul 2020**

CERTIFICATIONS

- Complete Full Stack Web Development Course from Udemy | [Certificate](#)
- Google Cloud Engineering and Machine Learning track program | [Certificate](#)
